ELEVATE YOUR SERVICES WITH ALTITUDE MEDIA CLOUD

A scalable and flexible processing **platform** designed to support the most demanding media applications. Altitude Media Cloud™ **powers** Encompass' cloud-native services.
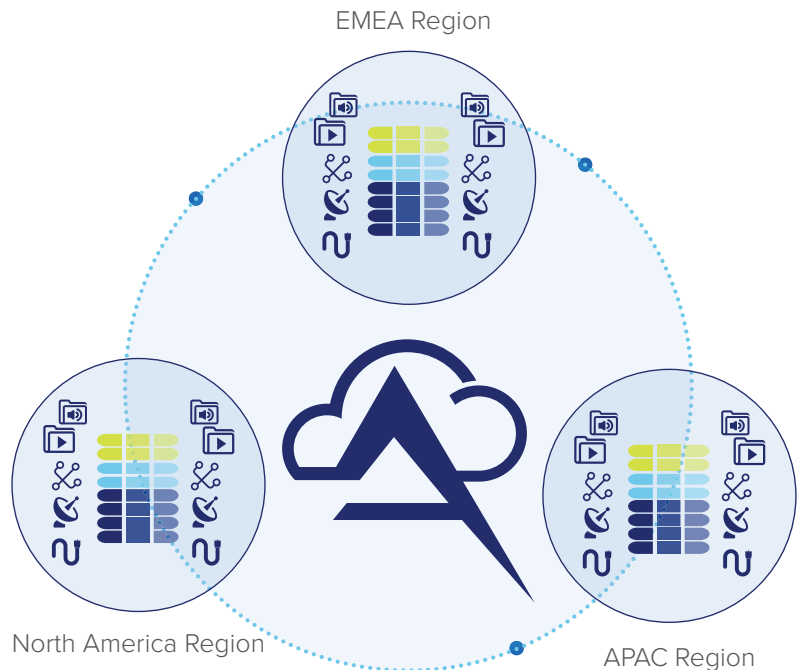

The platform is **built for broadcast**, providing customers with **on-demand** and **commitment-based pricing options** and **industry-defining SLAs**. Altitude is an **easy button** for you to manage and leverage content without the headache of building and maintaining a back-end technical framework. Altitude scales to match your needs at a speed that would be difficult to do internally.

Customers can leverage Altitude to scale services, reaching viewers worldwide and on-demand. We offer flexible storage tiers and deterministic pricing based on the service type. And, only Altitude Media Cloud offers exclusive access to a private network of broadcasters and media owners around the globe.

ALTITUDE MEDIA CLOUD FEATURES

Broadcast SLAs	Up to 99.999% availability across your entire service
11 '9's storage durability	Robust and reliable storage at a low, predicatble cost
Geo-diverse regions & availability zones	Enable services to have no single point of failure
