

GLOBALLY AVAILABLE CLOUD NATIVE, ALTITUDE PLAYOUT.

Altitude Payout is a globally available cloud solution that sets the benchmark for managed payout services. The comprehensive broadcast feature stack is securely deployed at scale, meeting every channel's rigorous requirements and ensuring every ad airs.

Altitude Payout is derived from Encompass' 40 years of deep-rooted experience in managed services – now reimagined and built for the cloud.

Our innovative service-centric approach empowers customers to define performance levels for individual channels and fine-tune their offerings with a versatile array of standardized feature packs tailored to specific channel needs.

Encompass' Altitude Payout ensures rapid deployment for precise audience targeting worldwide, with availability in 40 cloud regions across 24 countries. All geo-redundant cloud services are built on a secure foundation and automatically include built-in disaster recovery, providing peace of mind that channels are always on.

ALTITUDE PLAYOUT BENEFITS

- SERVICE-FIRST**
 Draw from Encompass' decades of expertise in payout and choose the appropriate service level for your channel.
- IN-BUILT DISASTER RECOVERY**
 Removes the need for additional backup by harnessing the power of diverse cloud deployments.
- GLOBALLY AVAILABLE**
 Available in 40 cloud regions across 24 countries.
- FLEXIBILITY AND PACK PORTABILITY**
 Choose from a comprehensive array of feature packs with the freedom to move between channels.
- SECURE BY DESIGN**
 Built from the ground up to meet CIS benchmarks for cloud.
